

Calm Down Corner

A safe spot to help a big feeling get smaller.

This is not a time-out, and you are not in trouble. A calm spot can be a corner, a chair, or a cushion, and an adult can sit nearby.

Take slow breaths

Smell the flower, blow the candle. Five times.

Squeeze something

Hug a pillow or press your hands together.

Look at a book

Turn the pages slowly until you feel calmer.

Count to ten

Count up slowly, then count back down.

Move your body

Push the wall, stretch tall, or wiggle it out.

Notice five things

Name what you see, hear, and feel around you.

Regulation before reason.
