

Emotion Thermometer

Notice how big the feeling is. Match it with a tool.

5 Biggest feeling

Body: shaking, yelling, cannot think.
Stay safe. A calm adult stays close. No teaching yet.

4 Getting big

Body: hot face, loud voice, fast heart.
Move: push a wall, stomp, squeeze, walk it out.

3 Bumpy

Body: tight tummy, wiggly, frustrated.
Take five slow breaths. Ask for help. Take a break.

2 A little off

Body: fidgety, quiet, not quite right.
Name it. Get water. Do a quick stretch.

1 Calm and ready

Body: relaxed, easy breathing.
Great time to learn, play, and connect.

These are common examples, not fixed rules. Every child is different.

In a meltdown, a child cannot learn.
